R. W. Stewart *University of British Columbia*

P. L. Welander *Göteborgs Universitet*

Geophysical Fluid Dynamics exists for the publication of original research papers and occasional review articles on the dynamics of the atmospheres of the earth and other planets and of the ocean, on air-sea interaction, theoretical and experimental studies of rotating, stratified, and convecting fluids, laboratory and numerical models of geophysical flows and related phenomena.

Alphabetical Index by Authors' Names

Deardorff, J. W.:

A Three-dimensional Numerical Investigation of the Idealized Planetary Boundary Layer, 377

Derome, Jacques and Dolph, C. L.:

Three-dimensional Non-geostrophic Disturbances in a Baroclinic Zonal Flow, 91

Dolph, C. L.: *see* Derome and Dolph

Erratum, 503

Gadgil, Sulochana: *see* Robinson and Gadgil

Geisler, J. E.:

Linear Theory of the Response of a Two-Layer Ocean to a Moving Hurricane, 249

Gierasch, Peter; Goody, Richard and Stone, Peter:

The Energy Balance of Planetary Atmospheres, 1

Goody, Richard: *see* Gierasch, Goody and Stone

Hasselmann, K.:

Wave-Driven Inertial Oscillations, 463

Howard, L. N.; Malkus, W. V. R. and Whitehead, J. A.:

Self-Convection of Floating Heat Sources: A Model for Continental Drift, 123

LeBlond, Paul H.:

Internal Waves in a Fluid of Finite Prandtl Number, 371

Lindzen, Richard S.:

Internal Gravity Waves in Atmospheres with Realistic Dissipation and Temperature: Part 1. Mathematical Development and Propagation of Waves into the Thermosphere, 303

McIntyre, Michael E.:

Diffusive Destabilization of the Baroclinic Circular Vortex, 19

McIntyre, Michael E.:

Role of Diffusive Overturning in Nonlinear Axisymmetric Convection in a Differentially Heated Rotating Annulus, 59

Malkus, W. V. R.: *see* Howard, Malkus and Whitehead

Martin, Seelye:

A Hydrodynamic Curiosity: The Salt Oscillator, 143

Moore, Dennis:

The Mass Transport Velocity Induced by Free Oscillations at a Single Frequency, 237

Munk, Walter; Snodgrass, Frank and Wimbush, Mark:

Tides Off-Shore: Transition from California Coastal to Deep-Sea Waters, 161

Niiler, Pearn P.: *see* Schulman and Niiler

Rhines, Peter:

Edge-, Bottom-, and Rossby Waves in a Rotating Stratified Fluid, 273

Robinson, A. R. and Gadgil, Sulochana:

Time-Dependent Topographic Meandering, 411

Schulman, Elliot E. and Niiler, Pearn P.:

Topographic Effects on the Wind-Driven Ocean Circulation, 439
